

## Administration Center

Manage Secure Remote Access with Ease

### Overview

GoToMyPC Corporate enables you to efficiently and easily manage your employees' remote-access privileges as well as empower your employees with the ability to instantly and securely view their PC desktops and use their office email, files, applications, intranet and all other corporate resources after hours, as if they were sitting in front of their PCs.

The GoToMyPC Administration Center is a personalized, secure Web site that provides time-saving management features for the GoToMyPC Corporate administrator. You'll be able to implement GoToMyPC Corporate throughout your organization; monitor and manage usage; and access live, up-to-the-minute reports — all in just minutes.

Setting up your employees to use GoToMyPC Corporate is a simple three-step process. GoToMyPC Corporate is designed to be intuitive and user friendly for both you and your employees, so your entire company can be up and running in minutes.

---

**“GoToMyPC  
Corporate is  
quick and  
easy to  
set up.”**

Scott Bates, Manager of  
Information Services,  
AAA Arizona

## Speed

### Roll Out in Minutes

Roll out GoToMyPC Corporate to your employees in minutes with your personalized online Administration Center. Enter your employees' email addresses, separating multiple addresses with semicolons, commas, spaces or line breaks. Then customize the email that is sent to your employees with any message you choose.

Your employees receive the email containing an activation link. After your employees click the activation link, the automatic download, configuration and installation take less than 2 minutes. No firewall configuration is necessary. Employees simply give their PCs a nickname, choose an access code and are ready to remotely connect to their PCs with complete security.

## Flexible and Convenient

### Easy Account Management

Access your online Administration Center to perform all your account-management duties anytime from wherever you are. Time-saving centralized billing and account management help to reduce total cost of ownership (TCO).

Quick, robust and intuitive report generation that allows you to view your reports in HTML, Excel or CSV helps you calculate ROI for GoToMyPC Corporate, get data by day and user, view total usage of GoToMyPC Corporate for your company during any period, monitor individual usage of GoToMyPC Corporate and view any employee's connection statistics. Quickly review company and plan information and change your administration password.

**“I find GoToMyPC Corporate much easier to administer than pcAnywhere™.”**

Debbie Gore, Director of Security, CareTech Solutions

# How the Administration Center Works

## EASY SETUP

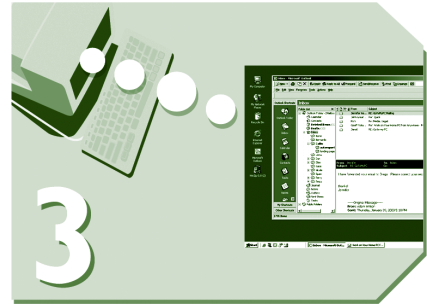

**Sign up and enable employees by entering their email addresses.**

## FLEXIBLE

**After an employee clicks the activation link, the automatic download, configuration and installation take less than 2 minutes.**

## CONVENIENT

**Employees are now ready to access their PCs with complete security. There is no client software needed to access the host PC.**

## Security and Control

### Manage Access throughout Your Organization from Anywhere

Citrix Online, the provider of GoToMyPC Corporate, is SiteSecure Certified, a standard that gives you and your organization confidence that your sensitive data is protected by the strongest state-of-the-art security available. Your online Administration Center is accessible only by the managers you designate. As an additional security precaution, the Administration Center log-in page is not available to the public via the GoToMyPC Corporate Web site.

To offer you an additional level of security, GoToMyPC Corporate provides the optional Authorization Management Service. This service gives you ultimate control of GoToMyPC Corporate in your organization by allowing you to block IP addresses, effectively preventing employees and others from accessing your organization's computers and networks via GoToMyPC Corporate and GoToMyPC Personal™ accounts not assigned by you.

Using the convenient online Administration Center, your company can customize the settings and permissions for GoToMyPC Corporate to meet your security requirements.

#### You can:

- Manage user and group permissions and settings
- Organize employees into groups based on your preferences
- Prevent access to sensitive documents and certain features
- Disable any employee's remote-access ability in seconds
- Force password changes
- Define hours of access
- Integrate with RSA SecurID
- Authorize client computer or host PC before initial use
- Integrate connection data to the Windows NT event log
- Set or change the connection "time-out" security feature ... and much more!

Using the convenient online Administration Center, your company can customize the settings and permissions for GoToMyPC Corporate to meet your security requirements.
