

## Quest Software Product Guide

Quest Software knows the expectations customers have for IT investments are not always met. That's why we develop innovative products that help our customers get more performance and productivity from their applications, databases and infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, we help customers meet higher expectations for enterprise IT.

### APPLICATION MANAGEMENT

#### Foglight®

Foglight® is the only adaptive application and services management solution that unifies IT and the business by connecting business services to infrastructure, end user to database, and production to development.

#### JClass®

JClass® provides industry-standard Java components for JEE and JSE, including charts, data visualization components and reporting, to boost developer productivity and ensure optimal code quality.

#### JProbe®

JProbe® is a comprehensive performance tuning solution for Java that helps quickly discover, diagnose and resolve performance issues in JEE and JSE applications down to line-level root cause.

#### PerformaSure

PerformaSure is a tool for diagnosing pre-production performance issues in multi-tiered JEE applications, combining end-user transactional data with infrastructure metrics to measure, analyze and maximize application performance.

#### Spotlight®

Spotlight® accurately diagnoses application performance problems in real time and graphically displays all application activity in an intuitive user interface, enabling faster problem resolution without customized scripts or cumbersome utilities. Spotlight is available for Oracle E-Business, Oracle, SQL Server, Unix, IBM WebSphere, BEA WebLogic and Web Servers.

#### Stat®

Stat® makes organizations more responsive to change and increases visibility into, and control over, the change process. Stat dramatically reduces the time required to deploy patches and critical changes throughout the various instances of an application, resulting in lower total cost of ownership.

### DATABASE MANAGEMENT

Deliver

#### Benchmark Factory® for Databases

Benchmark Factory® is a database performance and code scalability testing tool that simulates users and transactions on the database and replays production workload in non-production environments. Benchmark Factory is available for Oracle, SQL Server, DB2, Sybase, MySQL and other databases via ODBC connectivity.

## DATABASE MANAGEMENT (continued)

### Quest® Code Tester for Oracle

Quest® Code Tester for Oracle creates successful code for Oracle development groups. Rather than painstakingly write large amounts of test code, developers can generate it easily from user descriptions, then run tests with the press of a button. The result is that Quest Code Tester for Oracle integrates PL/SQL testing directly into development as a repeatable, verifiable process.

### SQL Navigator® for Oracle

SQL Navigator® for Oracle is a PL/SQL development solution that streamlines workflow by adding a drag-and-drop, graphical user interface to the PL/SQL development environment.

### Toad®

Toad® is the de facto standard for developers, DBAs and analysts. Toad increases productivity and application code quality. An interactive community also supports the user experience. Toad is available for Oracle, DB2, MySQL and SQL Server.

### Toad for Data Analysis

Toad for Data Analysis is a multi-platform database tool designed for IT and business professionals who need to access and understand their data from any source with one tool. It can deliver the insight your organization needs to make effective business decisions.

### Capacity Manager for SQL Server

From a single interface, Capacity Manager provides a complete portrait of storage requirements with easily interpreted reports, charts and graphs. It allows you to plot growth of instances, databases and objects as well as reclaim over-allocated space from databases.

### LiteSpeed™ for SQL Server

LiteSpeed™ for SQL Server dramatically reduces storage costs and backup/recovery windows by compressing data up to 95 percent, in about half the time of other backup solutions.

### Performance Analysis

Performance Analysis offers a comprehensive solution for diagnosing and tuning database instances and application workloads. It transforms performance management into a faster, easier and more efficient experience. Performance Analysis is available for Oracle and SQL Server.

### Quest Central®

Quest Central® is a suite of database management products that helps you deliver and manage superior performance of the database environment through periods of planned and unplanned change. It diagnoses the root cause of productivity bottlenecks, automates performance tuning, and analyzes performance metrics in detail. Quest Central suites are available for Oracle, SQL Server, DB2 and Sybase.

### Quest Change Director for SQL Server

This powerful, automated solution allows you to manage change to SQL Server databases with transparency. You can quickly roll out real-time or scheduled changes as well as monitor and report on planned or unplanned changes for proper tracking.

### SharePlex® for Oracle

SharePlex® for Oracle provides a fault-tolerant replica of your Oracle database by ensuring high availability and disaster recovery, eliminating risks associated with migrations, improving performance of OLTP systems and optimizing business intelligence applications.

### Space Manager with LiveReorg® for Oracle

Space Manager with LiveReorg® is a comprehensive solution for optimizing capacity and performance in Oracle databases. Its powerful reorganization, problem detection and capacity planning tools help maximize existing storage resources with minimal impact on applications and users.

### Spotlight

Spotlight is a powerful diagnostics tool that isolates database performance problems in real time and displays all database activity in an intuitive interface. Spotlight ensures faster problem detection and resolution without the need for customized scripts or cumbersome utilities. It is available for Oracle, Oracle RAC, SQL Server, SQL Server Enterprise, DB2 and Sybase environments.

## DATABASE MANAGEMENT (continued)

### Toad Data Modeler

Toad Data Modeler enables developers, DBAs and designers to create, maintain and document quality database designs and structures across more than 20 different platforms.

Control

### InTrust® for Databases

InTrust® for Databases helps to secure all corporate database assets by providing real-time, detailed notification of events such as intrusions, data theft and data fraud.

## WINDOWS MANAGEMENT

Active Directory

### ActiveRoles Direct

ActiveRoles Direct enhances native security and administration of Active Directory with role-based delegation. It also simplifies searches with business views and provides configurable web interfaces for multiple administrators.

### ActiveRoles Server

ActiveRoles Server offers a practical approach to automated AD and AD LDS (formerly ADAM) user provisioning as well as strict role-based administration and administrative policy enforcement for maximum security and efficiency.

### Domain Migration Wizard

Domain Migration Wizard enables migration to Active Directory, consolidation of Windows NT domains and splitting of Windows NT domains.

### Group Policy Extensions for Desktops

Group Policy Extensions for Desktops allows your administrators and security officers to enforce desktop end-point security through Group Policy.

### Group Policy Manager

Group Policy Manager offers Group Policy Object (GPO) management capabilities so organizations can efficiently deploy and manage GPOs for better security and control of their IT infrastructure.

### InTrust Plug-in

InTrust Plug-in provides real-time, detailed tracking of all changes to AD and Group Policy settings. By providing efficient collection and storage of audit data, this solution enables you to react to policy violations and unwanted changes to critical objects.

### Migration Manager for Active Directory

Migration Manager for Active Directory simplifies Active Directory-to-Active Directory migration and supports Active Directory redesign.

### NDS Migrator

NDS Migrator migrates users from Novell NDS and Bindery environments to Active Directory and Windows Server 2000/2003.

### Password Manager

Password Manager allows your end users to reset forgotten passwords securely, so you can implement stronger password policies while reducing the help desk load.

### Recovery Manager for Active Directory

Recovery Manager for Active Directory empowers users to recover from inadvertent deletions or modifications to Active Directory data in minutes, not hours.

### Recovery Manager for Active Directory *FOREST EDITION*

This tool simplifies the requirements for recovering the entire forest in the event of forest-wide corruption.

### Spotlight on Active Directory

Spotlight on Active Directory provides real-time diagnosis, troubleshooting and resolution of all problems related to Active Directory replication, performance and availability.

### Vintela® Authentication Services

Vintela® Authentication Services allows Unix and Linux systems to leverage the access, authentication and authorization tool already in place for Windows resources (Active Directory), functionally extending AD's capabilities including Group Policy for Unix/Linux.

### Vintela Single Sign-on for Java

Vintela Single Sign-on for Java provides a unified platform for identity management of Java and J2EE applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

## WINDOWS MANAGEMENT (continued)

### Intelligent Messaging

#### Archive Manager

Archive Manager makes e-mail a true asset for your organization by capturing, indexing, and storing messaging data for mailbox management, compliance, and knowledge sharing.

#### Availability Manager for Exchange

Availability Manager for Exchange preserves business continuity by ensuring e-mail functionality is always available for Exchange users, even when outages occur.

#### Collaboration Services

Collaboration Services enables secure synchronization of free or busy information and global address lists between organizations.

#### Exchange Migration Wizard

Exchange Migration Wizard migrates your environment directly to Exchange 2003/2007 with true coexistence through synchronization and ZeroIMPACT to end users.

#### GroupWise Migrator for Exchange

GroupWise Migrator for Exchange enables organizations to migrate from GroupWise to Exchange while preserving important organizational information and minimizing impact to users.

#### InTrust® Plug-in for Exchange

The InTrust Plug-in for Exchange provides real-time, detailed tracking of all user activity, non-owner access, as well as auditing of configuration changes and permissions to Exchange mailboxes and servers.

#### MessageStats™

MessageStats™ empowers executive management, information technology (IT) managers, and Exchange administrators to perform business-critical analysis and reporting on Exchange.

#### Migration Manager for Exchange

Migration Manager for Exchange is the comprehensive

solution for seamless inter-organization migrations from Exchange 2000/2003.

#### Migration Suite for Exchange

Migration Suite for Exchange is a ZeroIMPACT solution for planning and executing your migration projects to Exchange 200/2003 from Exchange 5.5/2000/2003.

#### Notes Migrator for Exchange

Notes Migrator for Exchange enables you to migrate directly from Lotus Notes to Exchange with robust project management and reporting tools, and minimal impact to users.

#### Recovery Manager for Exchange

Recovery Manager for Exchange rapidly and efficiently discovers and recovers business-critical Exchange data to aid with electronic investigations.

#### Spotlight on Exchange

Spotlight on Exchange provides real-time diagnostics, troubleshooting and problem resolution for Exchange.

#### Storage Suite for Exchange

Storage Suite helps you understand Exchange usage, consolidate mailbox archives for greater security and capture e-mail at an organizational level. This reduces the risk of non-compliance and allows you to quickly discover and recover critical information.

### SharePoint

#### Development Studio for SharePoint

Development Studio for SharePoint enables the rapid development of custom applications in SharePoint. This set of easily configured web parts and application templates reduces the cost and time to build custom collaboration applications by 50-80 percent and makes the full power of SharePoint available without coding.

#### Discovery Wizard for SharePoint *FREEWARE*

Discovery Wizard for SharePoint *FREEWARE* is a discovery tool that identifies all SharePoint servers, site collections and sites within an environment. You can quickly view and browse the discovered content and sites for further understanding of SharePoint within an organization.

## WINDOWS MANAGEMENT (continued)

### Public Folder Migrator for SharePoint

With Public Folder Migrator for SharePoint, you can easily perform bulk migrations of Exchange public folder content to SharePoint. This allows you to consolidate collaboration platforms for easier management.

### Recovery Manager for SharePoint

Recovery Manager for SharePoint is a scalable, enterprise solution for item-level SharePoint recovery. With comprehensive granular search, convenient previews and rapid restores of individual documents or entire backups, you save valuable time and money and gain assurance that your critical business information is preserved no matter what happens.

### Site Administrator for SharePoint

Site Administrator for SharePoint helps you reduce risks and gain control of SharePoint. It provides discovery, site and content browsing, data collection and reporting, and global policy management.

Windows

### InTrust

InTrust collects, stores, reports and alerts on event data from heterogeneous systems, and controls changes to Exchange, AD and GPOs. Using this single solution to manage all platforms simplifies audit log administration, reduces storage costs and secures information. It also reduces the costs and improves efficiency of reporting for security, operational and compliance purposes.

### Quest Storage Consolidator for Windows

Quest Storage Consolidator for Windows automates the online migration of file server data with security settings intact as a part of a server consolidation project.

### Quest Storage Manager for Windows

Quest Storage Manager for Windows enables storage administrators to perform intelligent assessment and automate crucial ongoing management tasks to ensure an optimized Windows storage network.

### Reporter

Quest Reporter enables you to collect, report on and resolve issues in AD and Windows-based configurations, which is essential for change auditing, Windows security assessments, or AD pre- and post-migration analysis.

Unix/Linux

### Vintela Authentication Services

Vintela Authentication Services allows Unix and Linux systems and applications to leverage Active Directory's capabilities, including Group Policy.

### Vintela Management Extensions

Vintela Management Extensions seamlessly integrates Unix, Linux, and Mac management natively within the SMS Administration Console. IT administrators can now use their preferred environment—Systems Management Server 2003—to manage both Windows and non-Windows systems.

### Vintela Single Sign-on for Java

Vintela Single Sign-on for Java provides a unified platform for identity management of Java and J2EE applications and services from the same Active Directory infrastructure used to provide single sign-on for Windows resources.

## About Quest Software, Inc.

Quest Software, Inc. delivers innovative products that help organizations get more performance and productivity from their applications, databases and Windows infrastructure. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 50,000 customers worldwide meet higher expectations for enterprise IT. Quest Software can be found in offices around the globe and at [www.quest.com](http://www.quest.com).
