

# Acronis Backup Solutions

## License Comparison

Acronis Backup is a family of data protection products that safeguards all business data, whether it resides on-premises, in remote systems, in private and public clouds, or on mobile devices. Acronis Backup includes an easy-to-use central management console, providing a single pane-of-glass view of all activities from a single interface.

Acronis Backup is the most complete solution on the market, providing best-in-class backup of physical Microsoft Windows® and Linux® servers; virtual VMware®, Microsoft Hyper-V®, and other hypervisors; and a complete stack of Microsoft® solutions, including operating systems, hypervisors, business applications, and cloud services.

Acronis Backup supports any storage – including local disks, NAS, SAN, tape devices, and cloud storage, including reliable and secure Acronis Cloud Storage.

With this document, you can select the product and specific licenses that fit unique business requirements and IT infrastructure.

Here is a quick comparison of the products:

Acronis Backup 12	Acronis Backup Advanced 11.7*
<p>Designed for small businesses with less than 50 employees, Acronis Backup works best protecting simple IT infrastructures and includes:</p> <ul style="list-style-type: none"> <li>• Patented disk-imaging technology, invented by Acronis</li> <li>• Proven bare-metal restore to the same or dissimilar hardware</li> <li>• Centralised and remote management of individual machines</li> <li>• Backup of single-instance databases, including Microsoft SQL®, SharePoint®, Exchange®, and Active Directory®</li> <li>• Support of local storage, network disk storage, and reliable Acronis Cloud Storage</li> <li>• Protection of physical Windows/Linux systems, virtual VMware vSphere, and Microsoft Hyper-V</li> </ul>	<p>Designed for medium-sized businesses and enterprises with more than 50 employees, Acronis Backup Advanced includes Acronis Backup capabilities plus support for a larger and more advanced IT infrastructure by providing:</p> <ul style="list-style-type: none"> <li>• Policy-based management of static and dynamic groups of machines</li> <li>• Support of tape drives, autoloaders, and tape libraries</li> <li>• Centralised managed storage with built-in deduplication</li> <li>• Backup of clustered Microsoft SQL, Exchange Database Availability Group (DAG), and SharePoint farms</li> <li>• Customisable reporting</li> <li>• Protection of Citrix XenServer®, Red Hat® Enterprise Virtualization, Linux KVM, and Oracle® VM Server.</li> </ul>

\* In July 2016, Acronis released version 12 of Acronis Backup, and is now working to add all the new features to the future release of Acronis Backup 12 Advanced. Both Acronis Backup Advanced 11.7 and Acronis Backup 12 are available for purchase today.

### ONLY ACRONIS

- **Delivers** complete data protection for small and medium-sized businesses, providing a unified console to back up and recover all individual workloads
- **Provides** Acronis Instant Restore™ and Acronis Active Restore™, reducing RTOs to seconds
- **Enables** backup of on-premise physical systems, virtual systems, and more, for complete protection of your entire IT infrastructure
- **Gives** complete control over the location of data, systems, and backups, even in the cloud
