

Welcome to think-cell 14

This new version brings improvements across all products within think-cell Suite

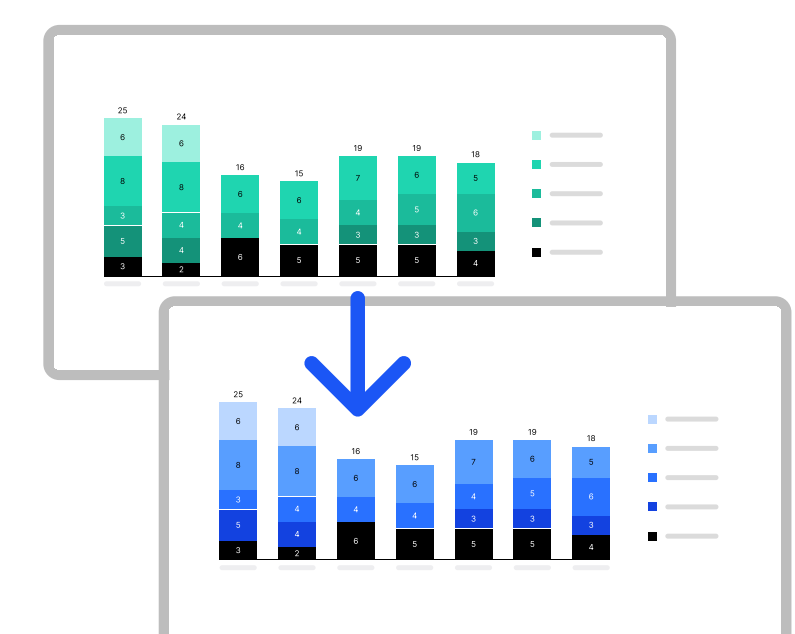

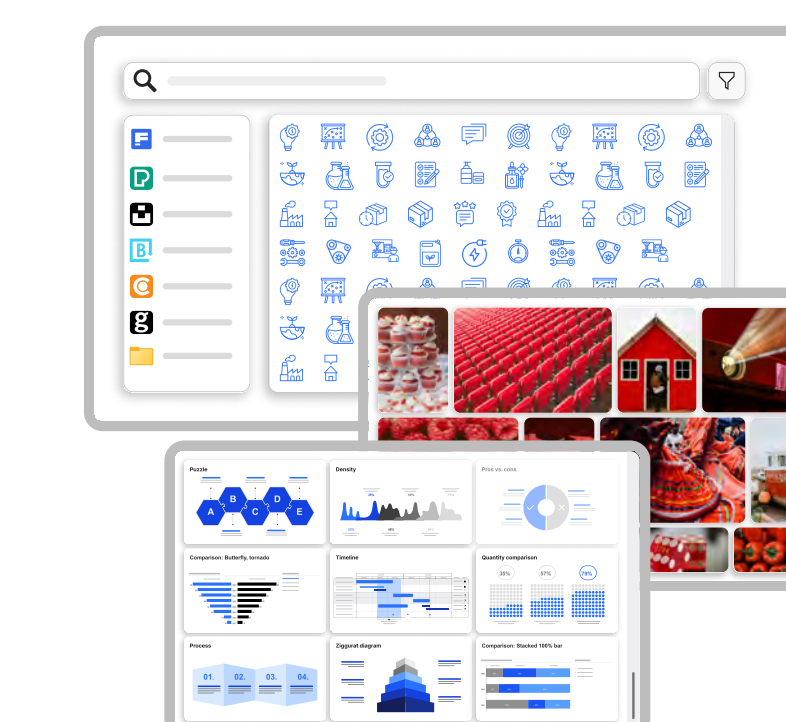

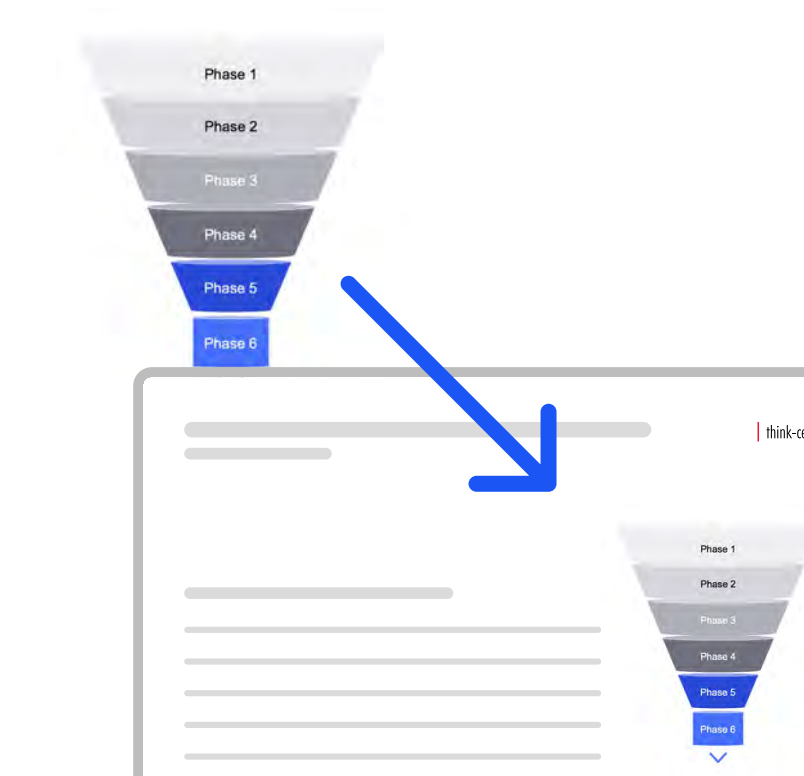

think-cell Charts

Net lines, data tables for charts, and a powerful slide datasheet work to help financial analysts and strategic planners visualize performance and make data-driven decisions.

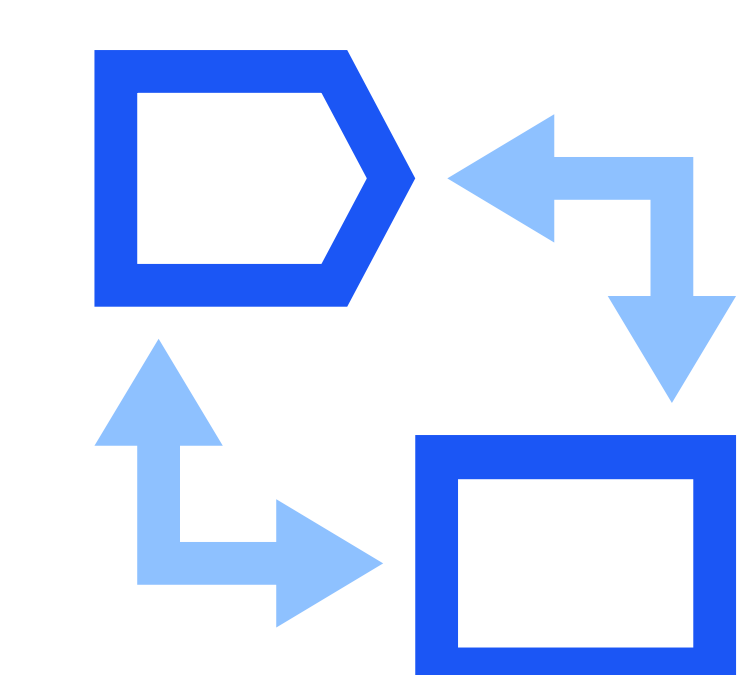

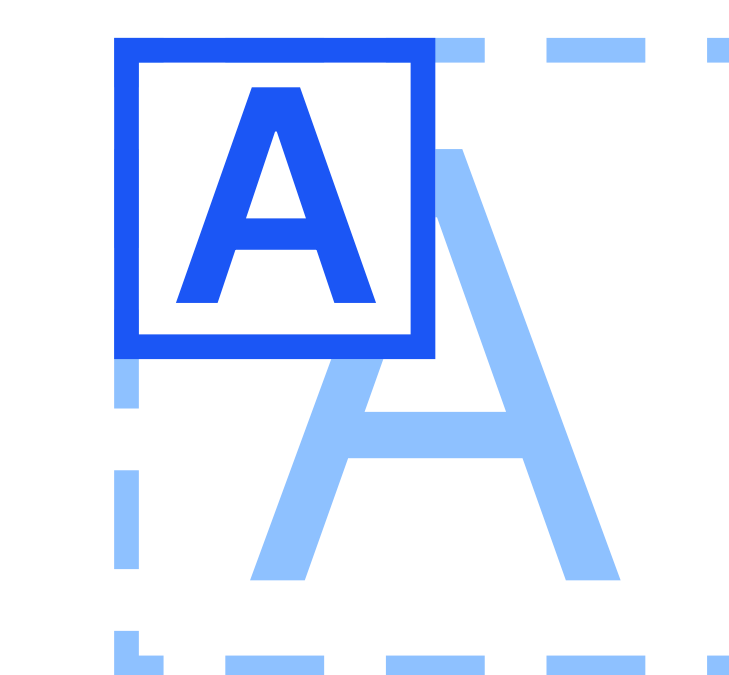

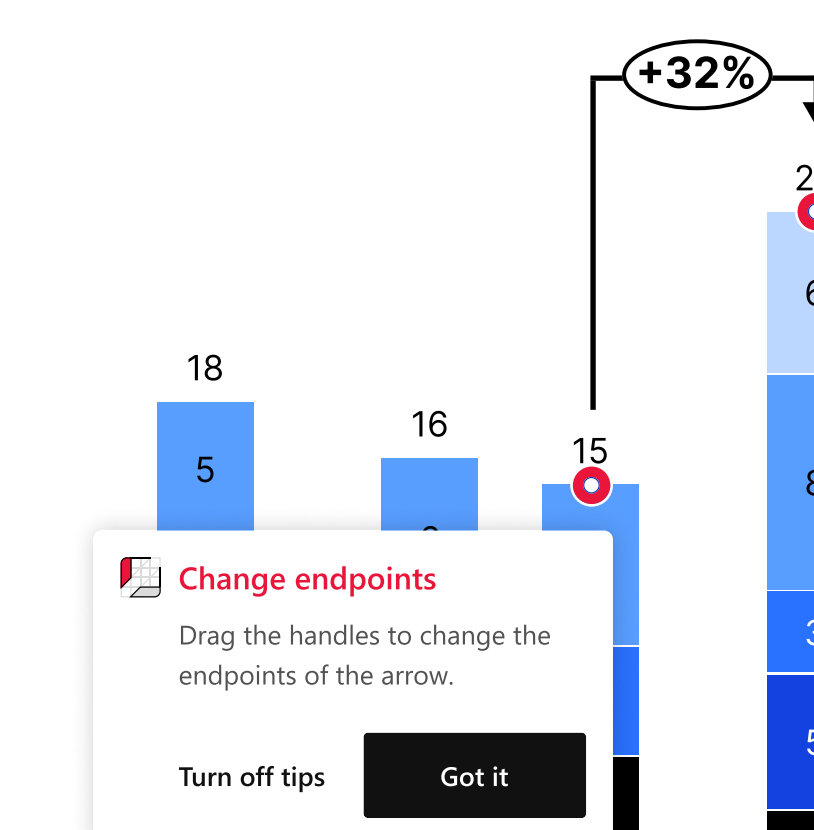

think-cell Library

Inserting shapes and flexible formatting options ensure brand consistency and give project managers and corporate communicators control over every slide.

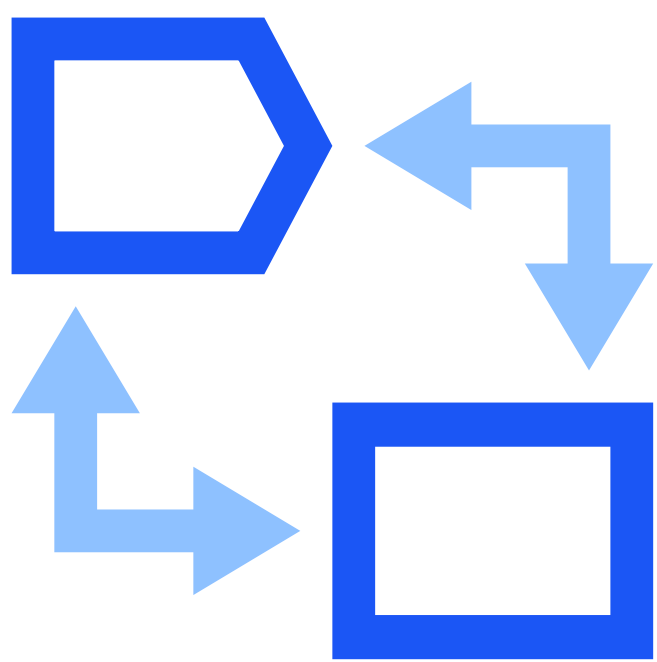

think-cell Core

In-product learning, flexible rescaling, and the ability to easily swap elements help every PowerPoint user create pixel-perfect presentations faster than ever.

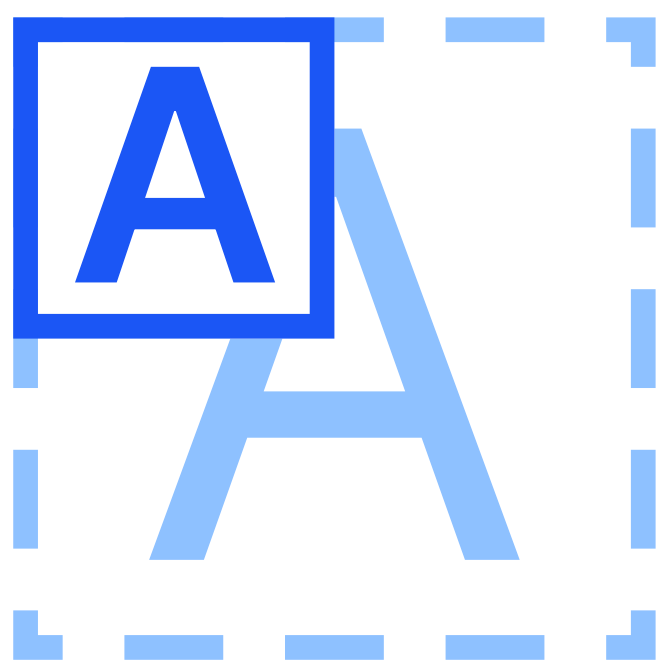

Efficient layout adjustment

Automate laborious steps of slide-building to better support your presentation story.

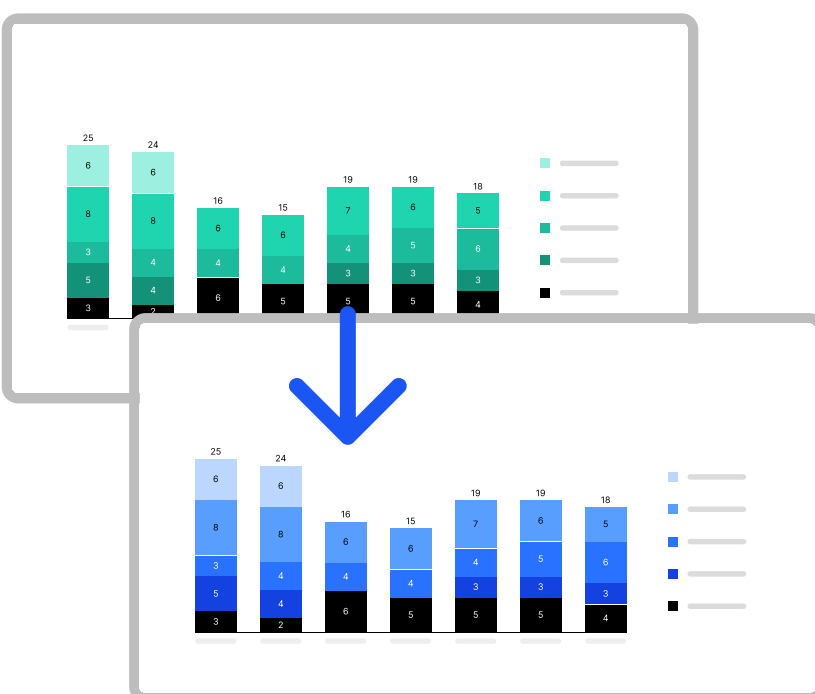

Swap
Rearrange slide elements faster by swapping them with ease.

Rescale
Easily scale objects with precision, keeping fonts and shapes in proportion.

Flexible content reuse

Leverage your existing assets and accelerate the journey from blank slide to meaningful content.

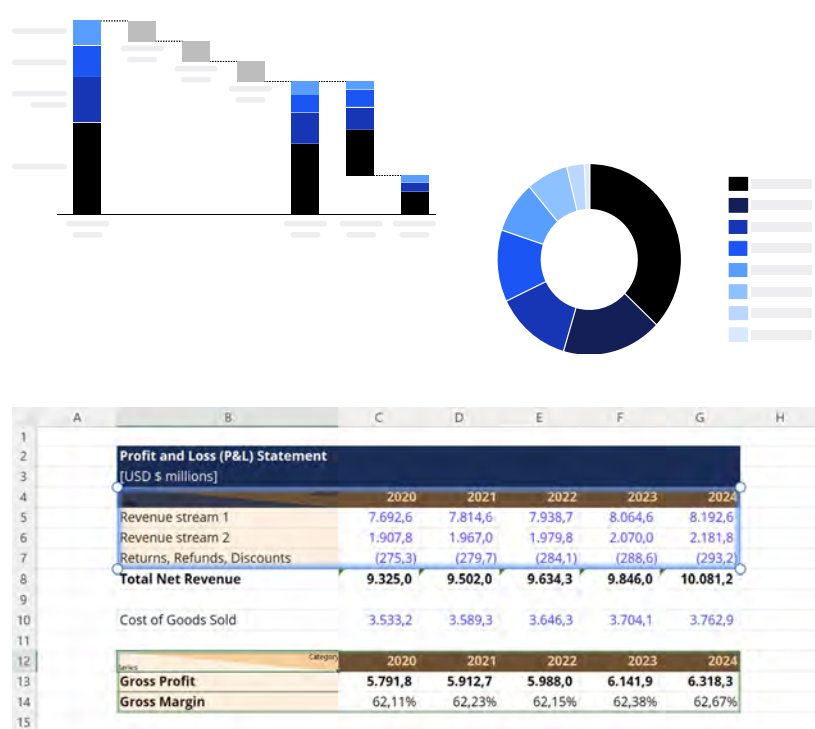

Insert slides with source or destination formatting
Maintain brand consistency or preserve original formatting with flexible insert options.

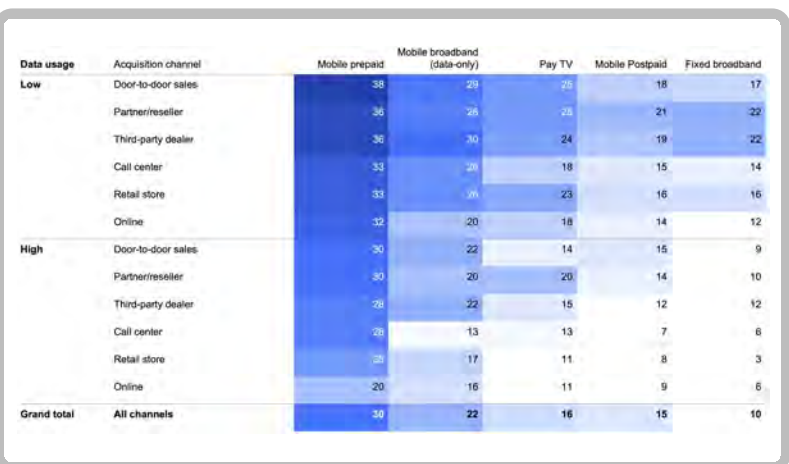

Insert shapes
Insert branded shapes from the library, ensuring consistency across all slides.

Enhanced Excel-driven reporting in PowerPoint

Streamline how to manage and connect your data to present it with maximum confidence.

Slide datasheet
Simplify data management and analysis with one powerful slide datasheet.

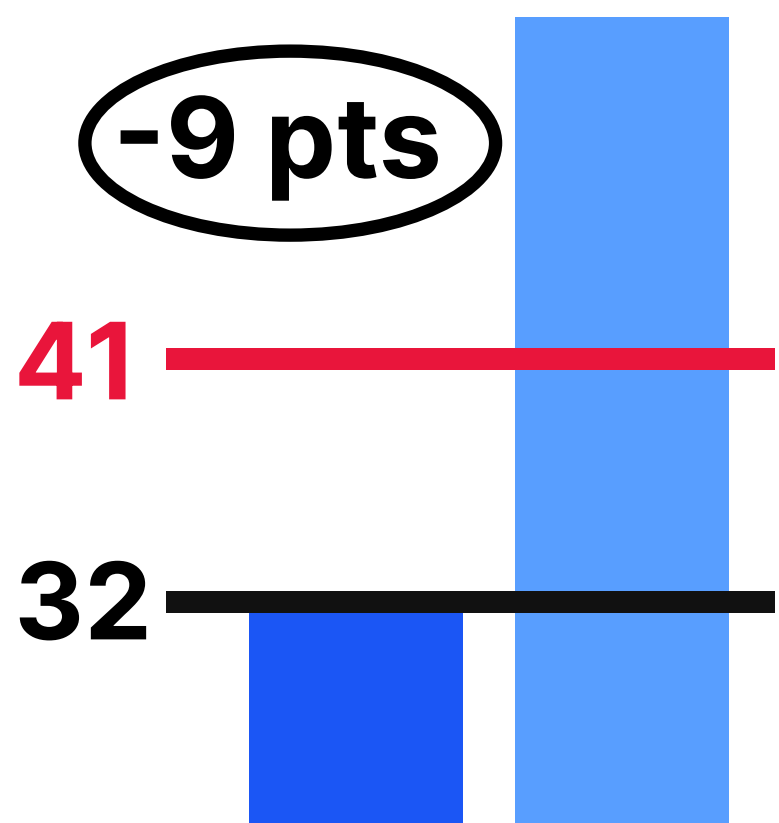

Insert table with formatting or as image
Insert tables from Excel with formatting or as a dynamic image with one click.

Advanced insight visualization

Visualize your insights with more annotation and chart options to cover a wide range of data scenarios.

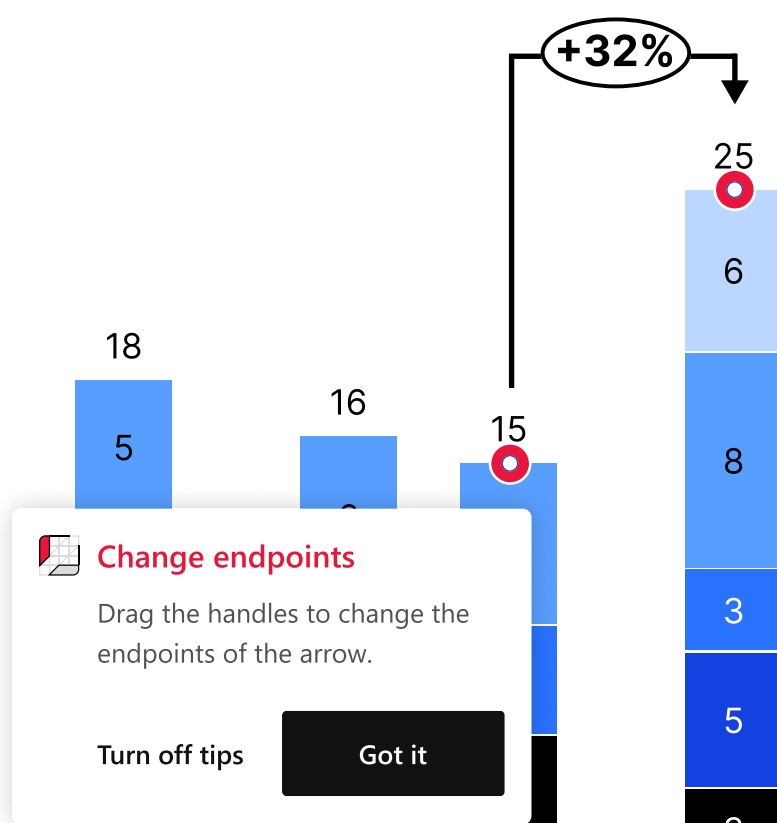

Data table for charts
Add a data table next to your chart with a single click, sourced from the same data.

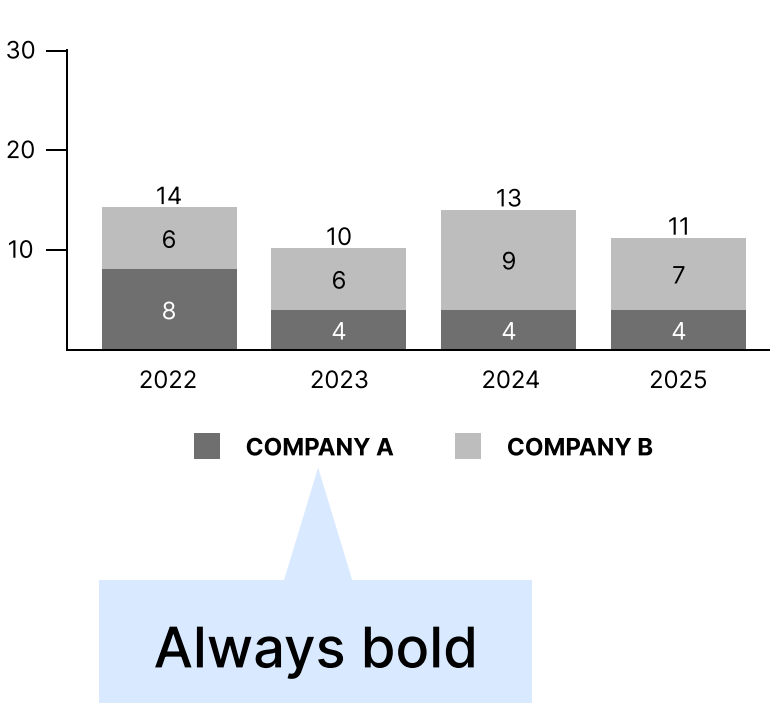

Net lines
Visually compare performance against key benchmarks or future projections.

Improved think-cell experience

Enjoy the benefits of using think-cell more quickly with an improved user-experience.

In-product learning
Quickly learn how to use think-cell right inside PowerPoint, with no manual.

Additional style file support
Automatically enforce brand guidelines and corporate identity in slides.

Create more impactful presentations faster
